Dot Pad

Making the World More Accessible Dot By Dot

This next-generation tactile graphics display brings digital content to life through touch, making images, charts, maps, and text instantly accessible for users who are blind. With seamless integration with screen readers, the Dot Pad transforms visual information into a tactile experience like never before. It's not just a device — it's a revolution in accessibility, delivering detail, clarity, and independence at your fingertips.

Key Features

- Dual-display support
- Ultra-fast pin refresh — under your fingertips
- Accessible charts, graphs, maps, and more
- Built-in drawing and content creation tools
- Educational games included
- Seamless integration with Windows and iOS
